

The background of the slide is a dense field of 3D-rendered numbers in various shades of blue. The numbers are of different sizes and are scattered across the entire frame, creating a sense of depth and data. Some numbers are more prominent than others, while others are partially obscured.

# Understanding Smart Device Usage

Fitbit User Activity Analysis & Bellabeat  
Marketing Recommendation

Google Data Analytics Capstone Project

30 September 2026

# Agenda

- |                              |            |
|------------------------------|------------|
| ◆ Introduction               | 3 minutes  |
| ◆ Project Overview and Goals | 3 minutes  |
| ◆ Data and Analysis          | 10 minutes |
| ◆ Recommendation             | 4 minutes  |
| ◆ Actionable Steps           | 5 minutes  |
| ◆ Question                   | 5 minutes  |

# Business Task

## Objective

Analyze smart-device usage data to identify trends in user activity and provide marketing recommendations for Bellabeat

## Key Question

1. How active or sedentary are users?
2. What patterns can be observed?
3. How are activity level related to daily steps?
4. How do activity levels vary between participants?
5. How can these findings inform Bellabeat's Marketing?

# Data & Analysis Approach

## Data Sources

Fitabase smart-device usage data

url: [FitBit Fitness Tracker Data](#)

## Key Variables Analyzed

Total Steps

Activity Minutes

Activity Distance

Calories

Sleep Data

## Analysis Process

Clean → Validate → Analyze →  
Visualize → Recommend

# Sedentary Activity Was Prominent

Recorded sedentary activity time was substantially higher than other activity categories.

Average Time Spent  
by Activity's Intensities

# Light Activity Dominated Recorded Distance

Light Active Distance was the largest recorded active-distance category.

# Light Activity Dominated Recorded Distance

- ◇ Total Steps showed positive relationships with all three active-distance measures.
- ◇ Very Active Distance had the strongest correlation with Total Steps.

# Sedentary Time vs Steps

Sedentary Minutes had a weak negative relationship with Total Steps  
( $r = -0.29$ ).

# Activity Levels Varied Across Participants

- ◇ Average daily steps varied considerably across participants.
- ◇ Suggesting that individual activity patterns differ, and that overall average does not represent every user.

# What Does This Mean for Bellabeat?

## Everyday Movement Matters

Recorded activity included substantial sedentary time and a large amount of light activity.

## More movement is reflected in higher activity measures

Active-distance measures were positively associated with Total Steps.

## Users are not all the same

Individual average step levels varied across participants.

# Product Application

Selected Product

## **Bellabeat Leaf**

The Leaf is relevant because the analysis highlights everyday activity patterns, sedentary behavior, and the importance of consistent movement.

## **Customer Opportunity**

**From:**

“People are sedentary.”

**To:**

“There is an opportunity to encourage greater awareness of everyday movement and build sustainable activity habits.”

# Marketing Recommendation

## “Move More, Little by Little”

### Core message

Your wellness isn't only your workout.  
Every movement throughout your day  
matters.

### Campaign direction

Encourage users to:

- Be more aware of sedentary periods
- Add small amounts of movement throughout the day
- Build consistent everyday activity
- Focus on sustainable habits rather than only intense exercise

### Example marketing message

**“Move More, Little by Little.”**

Small movements throughout your day  
can become part of a healthier routine.

# Call to Action

## 1. Develop an “Everyday Movement” campaign

- ◇ Launch a campaign around “**Move More, Little by Little**”, emphasizing small, consistent movements rather than only intense workouts.

## 2. Target different activity levels

- ◇ Lower-activity users → encourage small, achievable movements
- ◇ More-active users → encourage consistency and maintaining routines

## 3. Use the Bellabeat product as the campaign touchpoint

- ◇ Position the selected Bellabeat product as a companion for building awareness of everyday activity and wellness habits.

## 4. Test and measure the campaign

- ◇ Engagement with campaign content, Product/app engagement, Campaign click-throughs, Conversion or purchase behavior

## 5. Iterate based on results

- ◇ Use campaign performance data to determine which messages and audiences respond best, then refine future marketing efforts.

THANKYOU
